

# Financial Systems Optimization Review

**PATHWAY  
HEALTH**  
Insight | Expertise | Knowledge

## Pathway Health breaks down the business of billing and collections.

Our experienced financial consultants will review your system for the best workflows and configuration, utilizing the functionality of the system.

### Payer Setup Review

At the facility level, an analysis of the effective structure of ancillary rules, rate templates and schedules in use for up to 25 payers.

### UB Billing Review

A focused review of the UB batches for claims that need to be manually corrected and adjustment batches for proper AR booking.

### Collections Utilization

An examination of the use of collections modules for notes and upcoming tasks, in order to simplify the AR review processes.

### EMC Payer Review

A focused review of the EMC level payers—ideal for growing companies who plan to add new facilities in the future.

### Comprehensive Review

A complete review of the configuration and end-user functionality within the system. The analysis includes all focused reviews and uses of trust, admission information, organization setups, payer setups, charge codes and census changes.

Reviews can be purchased a la carte or as a comprehensive package. Each review will include suggestions on how to better utilize your system. After the review is completed, a trained ePath expert can develop an action plan to configure your system or retrain your staff for optimal use.
