Reimbursement Services for Financial Stability

Value-Based Purchasing and Quality Outcomes

As a leader, you must support all efforts to capture data from positive quality outcomes to ensure your facility is properly paid, or reimbursed, for the valuable care and services you are providing. Optimization of reimbursement and matching resource utilization to resident acuity is an important part of improving financial performance for any health care organization.

To better prepare for the new direction of health care, including Value-Based Purchasing, providers are looking to Pathway Health for assistance with tools, resources and training. Assisting providers in their ability to achieve financial stability and quality performance in the complex reimbursement environment is our passion.

Unique Approach, Tailored to Meet Operational Goals

Pathway Health's reimbursement services ensure your organization is accurately completing assessments and optimizing reimbursement, while maintaining compliance. We provide reimbursement consultation to assist organizations in mitigating risk and identifying areas for performance improvement.

At Pathway Health, we offer a unique approach to reaching your operational goals. We start by analyzing your facility's data to set benchmarks and expectations for performance improvement. We observe and interact with staff to assess their knowledge and competencies, as well as review internal processes to make adjustments that align with industry best practices.

Our hands-on approach continues with mentoring, training and education by our team members. Whether onsite or off-site, our reimbursement experts develop action plans to get you on the right path for achieving Medicare and Medicaid reimbursement positive outcomes.

Gain reimbursement expertise to meet the changing health care environment.

Reimbursement Response Services to Keep on the Right Path

Pathway Health has specifically designed targeted clinical reimbursement and revenue cycle management resources and training. We assist agencies across the nation to ensure they meet compliance and operational goals. Our consultants help analyze outcomes measurements, appropriate coding practices, MDS and Medicare criterion for positive outcomes.
