Clinical and Financial GAP Analysis Solutions

Pathway Health offers a series of EHR system reviews intended to enhance the configuration and effective use of your clinical or financial systems.

GAP Analysis Overview

- Database review to determine current use and potential of Clinical and Financial modules
- Comprehensive configuration analysis at enterprise and facility level
- Review end-user usage and performance
- Conversation to identify end-user pain points to be addressed
- Review security roles and access

Why Choose a GAP Analysis Solution?

- Identify underused and unused software modules or features
- Discover custom configuration for data consistency and ease of use
- Impact end-user pain points
- Improve data flow and efficiency
- Update access to modules and data specific to end-user needs

Our ePath experts offer various approaches to determine the best practices in financial management, clinical management, system configuration, staff utilization, efficient workflow, and more.
